Full HD Display

With large high visibility color display, Full HD screen enables stable business.That is highly visible both indoors and outdoors.

Keypad (35 keys plus Function key)

For maximum efficiency,
physical keyboards are available.
M3 UL20 includes 35key Alpha Numeric key.
Each features an easy-to-use ergonomic design and
Function keys are installed for fast operation in the field.

IP67 sealing, 2.0m drop

IP67 dust / water proof withstands 2.0m drops. Device can be used in harsh environments.

Li-ion, 3.6V, 6,700mAh

The large capacity 6700mAh battery makes it suitable for long shifts where charging of the device is very limited.

M3 UL20F

High Performance in coldest environments
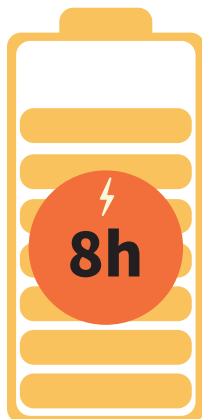

Defogging makes vivid window

UL20 has automatic sensor to control temperature of screen and scanning window. When the temperature goes down, the sensor is working to keep moderate line which UL20 operates. The module smartly control LCD. Heating LCD stands alone even UL20 is on sleep status. Also, equipped battery endures low temperature.

UL20F Scanning window

-30℃

8h

Endures in low temperature! (It applies for UL20F)

In cold warehouse, LCD and keypad working on the low temperature is essential. UL20 is upgraded as working under the -30℃ by automatically controlling Heating LCD. It provides convenience to the user while reducing battery consumption.

M3 UL20W

Support WiFi Only Products

UL20W specializes in indoor working space where Wi-Fi is usually used. Reasonable UL20W will reduce your TCO (Total cost of ownership). Smooth operation indoors has benefit of free compatibility with many kinds of apps. Data communication between co-workers has no barriers if they're connected with Wi-Fi. Wireless communication is fast and stable as much as wired one.

Pursuit of all-round excellence on a Mobile Computer, M3 Black

The user-friendly design combines with great performance to deliver in the harsh environments. The M3 BLACK has a user friendly design which is reliable and simple but very robust.

Key points

Ergonomic Design can reduce fatigue with repetitive scanning

Low angle (23 °) barcode scanner

Low angle scanner allows users to feel more comfortable during repetitive scanning operations in the fields. The design provides users the convenience to see the LCD screen when scanning which reduces physical tiredness of the wrists and eyes.

User Friendly design to locate the scan button by touch

Embossed scan buttons applied

Small bumps on the scan buttons at the front and side enables users to recognize and scan without a glance which reduces actual amount of time and increase efficiency. Button faces are placed on an angle to make pressing it more easier and comfortable.

Continue working, even in darkness

5.0MP camera with ultra flash

The 5.0MP Ultra flash helps users to use the camera even in the dearkest of work surroundings. Data capturing and photographing in dark and harsh environments will be easily handled.

Functional design with stands heavy dropping

Rubber / Metal applied on case

Many things can happen during working hours, such as a drop. By applying anti-slip rubber, the device will not slip from your hands. If you drop the BK10, the metal frame can withstand multiple drops from up to 2 meters.
